

Where can I apply in Austria?

Should you decide to go abroad for a set period of your training, you will **always find help and support** if any queries should arise and while organizing your project.

In all European countries you will find institutions that are competent points of contact and support in all connected issues.

As a rule, colleges and training companies have access to information about institutions organizing periods abroad in your home country.

In addition, **national agencies for lifelong learning**, the main tasks of which include mobility and the cross-border exchange of young people in initial vocational education and training (IVET), have been set up in all countries. These national agencies also distribute the European Commission's funds for mobility stays.
